CAREER OBJECTIVE

I am an Associate Software Engineer with hands on experience on developing, testing, deploying applications with a demonstrated history of working in the information technology and operations industry. On the technical side, I have skills in full stack development particularly Java and Angular. I am interested in a position where I can use my skills and discipline that I learned from school and previous employers, where I could learn from other people who in the field and to further hone my skills so I can become more competent and knowledgeable.
